News Release: Visible® provides insight into Falcon Jet component processes.

BOSTON, MA – January 15, 2014 – Visible Systems Corporation provides Traceability to Falcon Jet with a new release of **Visible Analyst ENTERPRISE Edition** through which the representation and traceability of meta-data is visualized in the form of UML component and deployment models. Through a combination of visualization methods, Visible helps its clients to conceptualize their ideas or concepts in the form of various models - whether it be to better align resources to opportunities, address new customer requirements, improve business processes or adjust to changing sales or market trends.

"Falcon Jet came to us seeking a solution to track a large volume of meta-data generated by various components of systems and subsystems both on and off the plant floor. Using a combination of Visible's UML component and deployment model capabilities in conjunction with its integrated repository, Falcon Jet was able to represent component-level meta-data and see the data flows from each data point back to the data source. The results gave Falcon Jet an understanding of which components referenced and required which data and who was responsible for maintaining the data." said Michael Cesino, President & CEO.

BENEFITS:

- Provide transparency to product development and increase release confidence.
- Eliminate bottlenecks in your develop-test-deploy process.
- Know how changes will impact production environments - keeping application code, schema, people, and processes on the radar.
- View impact analysis and analytics for accurate planning and decision making around your product and/or application components.

About Falcon Jet:

Falcon Jet, a wholly owned subsidiary of Dassault Systems, manufactures custom private jets. Falcon Jet uses one of the world leading Product Data Management (PDM) packages from Dassault Systems PLM Solutions. It allowed Falcon Jet partners and suppliers from around the world to design a new product - concurrently and in real time - without physically leaving their workplace.

About Visible Systems Corporation:

Visible Systems Corporation is a leading supplier of integrated modeling tools and solutions for enterprise applications, information management and business process re-engineering. For more than 25 years, Visible has been dedicated to providing businesses with model-based solutions and services in conjunction with consulting, education, and support around the world.
